

Free area (Freier Bereich) in teaching studies

- **There is one account for the free area (number 1500) per degree (teaching profession at elementary schools / middle schools / secondary schools / grammar schools).**
- **The concrete modules defined in the subject examination regulations for the free area are assigned to this account 1500. This assignment is made by the department L2 as part of the modeling of the examination regulations.**
- **In addition, there is a placeholder module called ‚Weitere Lehrveranstaltungen Freier Bereich‘ (‚Other courses free area‘) in each teaching profession type, to which individual exams and courses can be assigned.**

Handling of modules and exams in campo (1/2)

- If entire modules are to be reassigned to the free area in the teaching program, notification must be made to the department L2, which will then make the assignment.
- Additional exams offered in the free area are also assigned centrally to the respective modules by L2.

Handling of courses in campo (2/2)

The assignment of courses to one or more of the placeholder modules

- 12020 – Lehramt Grundschule (elementary school)
- 12030 – Lehramt Realschule (secondary school)
- 12040 – Lehramt Gymnasium (high school)
- 12070 – Lehramt Mittelschule (middle school)

is done decentrally by the lecturers or campo administrators.

Assignments are made in the same way as courses are assigned to regular modules. You can find instructions on how to do this under this [link](#).
