

**Information about data processing in the context of taking remote electronic examinations on the basis of EFernPO and BayFEV (Bavarian regulation for taking remote electronic examinations)**

**Purpose and information**

Remote electronic examinations can be taken at Friedrich-Alexander-Universität Erlangen-Nürnberg (FAU) on the basis of the Bavarian regulation for testing remote electronic examinations (EFernPO and BayFEV).

This involves processing personal data. Friedrich-Alexander-Universität Erlangen-Nürnberg is the controller responsible for processing your personal data as defined by Article 4 (7) of the GDPR.

Personal data are processed to facilitate remote electronic examinations when IT systems are used. In cases where external service providers are used, data may be processed by the relevant system operator outside FAU's immediate sphere of influence.

Great emphasis was placed during the configuration of all systems on processing only those personal data that are necessary for the intended purpose or for technical implementation. The same applies to the storage period of the data.

The collected data include data required for setting up connections such as IP addresses and personal data for identification, as well as audio and video files.

More detailed information is available in the relevant descriptions of the data processing task, which can be obtained on request from FAU's Data Protection Officer.

**Rights of the data subject**

Data subjects have rights in accordance with Article 13 GDPR.

**Please address any questions on legal issues regarding data protection to: [datenschutzbeauftragter@fau.de](mailto:datenschutzbeauftragter@fau.de)**

**Please address any questions about taking the examination and any technical issues to the relevant examination coordinator.**
